COMMANDER SERIES (ST/HS) TO BE DISCONTINUED AS OF NOVEMBER 1, 2008!

Due to the unavailability of certain component parts, effective November 1, 2008, Gentex Corporation will discontinue sales of the Commander¹ (ST/HS) Series of signaling appliances.

In the interest of customer satisfaction, we would like to inform you that Gentex will continue to offer support on this product through that date.

After November 1, 2008, Gentex will not accept returns on this item unless it is a warranty situation. If these units are needed for a new installation or for an existing job, please order them as soon as possible.

Gentex Corporation will continue to offer the remainder of the Commander lines of signaling products, including the Commander² Series, Commander³ Series, and Commander⁴ Series. The Commander² Series offers all of the features currently found in the Commander¹ Series, with the addition of the Super-Slide[®] mounting bracket.

Thank you for your continued support.
