**VERIFY FUNCTION**
1. Using a cloth cover windshield facing sensor (location may vary based on model type)
2. Shine light (flashlight) at driver facing sensor

**ENSURE:**
1. EC mirror harness power wire is securely tapped into OEM harness.
2. Ignition wire is receiving +12V.
3. Ground wire is securely attached to vehicle ground.

**START**

Make sure vehicle is on. Press power button if available.

Does mirror darken?  

Is the mirror receiving +12V?

YES  

NO

YES

NO

YES

NO

STILL NO

Contact OEM dealership for replacement harness.

Mirror functions to design intent.
