## FDM PROGRAMS

FDM is offered on over 75 different vehicle nameplates, representing over 14 different brands.

The Gentex Full Display Mirror (FDM®), is an intelligent rear-vision system that uses a custom camera and mirror-integrated video display to optimize a vehicle's rearward view. The system captures video from a rearward-facing camera and streams it to a unique mirror-integrated LCD that provides the driver with an unobstructed, panoramic view behind the vehicle.

The mirror features bi-modal functionality. In mirror mode, the product functions as a standard rearview mirror, but with the flip of a lever, the mirror enters display mode, and a clear, bright, LCD display appears through the mirror's reflective surface, providing a wide, unobstructed rearward view.

  - Most satisfying advance technology

### PROFESSIONAL-GRADE FDM

No one has more rear vision experience than Gentex, which is why over the years we've been the leading supplier of intelligent rear vision systems for OEM racing programs, including Audi, Nissan Motorsports, Toyota Gazoo Racing, Cadillac, Porsche Motorsports, and others. Our custom racing FDMs have helped numerous teams "see their way" to victory.
